Chapter: 2003 Jordan Atomic Energy Commission

Creation: Jordan Atomic Energy Commission was established early in 2008 as a successor for Jordan

Nuclear Energy Commission in order to transport, enhance and develop peaceful uses for nuclear

energy.

Vision: Transforming Jordan from an importer country of energy into an exporter country of electric energy

by 2030 and peaceful and safe usage of nuclear energy within the best international practices and

the most safe for community and environment.

Mission: Contribute to social and economic development through the usage of nuclear reactors in electricity

generation and water desalination and any other peaceful purposes and transforming from direct

dependence on fossil fuel sources to alternative energy sources.

Legal Framework: Atomic Energy Law No.(42) for 2007 and amendments thereto.

Tasks of the Ministry / Department:

- _ Implement the vision and integrated strategy for the Jordanian nuclear program for peaceful purposes.
- _ Build and develop the required human staffs and capacities to implement the Jordanian nuclear program
- Enhance cooperation with IAEA and similar institutions and with friendly and expertise countries in the field of atomic energy and radiation technology

Ministry/Department Contribution to the Achievement of the National Objectives:

- _ Develop and upgrade the institutional capacities of the Commission.
- Transport, settle and develop nuclear energy and radiation technology in the kingdom and expand and sustain their usage
- Establish investment projects to serve the national economy in the field of nuclear energy and radiation technology and using them for electricity generation, water desalination and other applications
- Promote the position of Jordan in terms of science and transform Jordan into a regional center in the field of nuclear research and applications.
- Establish nuclear reactors and use the Jordanian Uranium to provide energy alternatives and water desalination
- Use and invest the natual nuclear investments existing in Jordan such as Uranium and thorium, and other natural minerals like unique elements
- Transform Jordan into a regional center for producing medical radioisotopes and train the competent scientific staffs

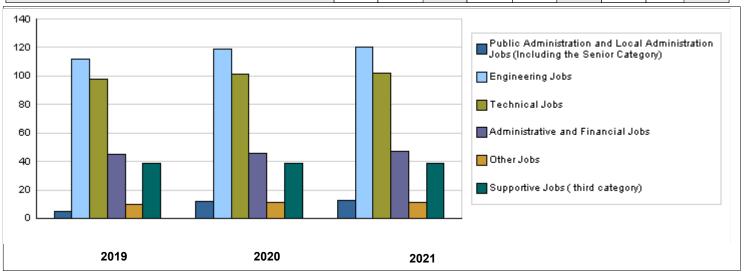

Major Issues and Challenges which face the Ministry / Department:

- _ Lack of sufficient financial resources necessary for implementing the Jordanian nuclear program.
- _ Lack of national human competences with critical specializations necessary for program implementation which will lead to using foreign competences with high costs.
- Not dealing substantially with the Jordanian nuclear program by some, and distorting realities and benefits of the program and portraying it as a major economic and social problem.

6181 Administration and Support Services Program

Objective of the program:

- 1- Transfer, indigenize, develop and sustain the uses of nuclear energy and radiation technology.
- 2- Establish investment enterprise to serve the national economy in the field of radiation technology and nuclear energy.
- 3- Use the nuclear reactors of different capacities for electrical power generation and water desalination.
- 4-Explore and mine Uranium and rare land minerals and produce the Uranium Concentrate (yellowcake) to enhance the local energy sources.
- 5- Provide work environment and logistic services for units and directorates.
- 6- Develop the capacities of the Commission's directorates and units.
- 7- Improve the management of programs and projects implemented by the Commission.

The strategic objective related to the program:

- 1- To develop and upgrade the institutional capacities of the Commission.
- 2- To transfer, localize, develop and sustain the nuclear energy and radiology technology

Directorates associated with the program:

- 1-Technical Services Directorates:
- Research and Information Labs Directorate
- Uranium Labs Directorate
- Gama Radiology Directorate
- Radiation and Emergency Protection Directorate
- Ionizing Radiation Directorate
- Quality Assurance Directorate
- Physical and Chemical Analysis Directorate
- Transport and Radioactive Waste Management Directorate
- Nuclear Projects Development Directorate
- Advanced Energy Systems Directorate
- International Cooperation Directorate.
- 2- Administrative and Financial Services Directorates:
- Information Technology and Security Directorate
- Human Resources Directorate
- Financial Affairs Directorate
- Administrative Affairs Directorate
- Audit and Internal Control Unit
- Institutional Development Unit
- Office of the Chairman and bureau

Services provided by the program:

- Providing laboratory checkups and tests that serve the uranium exploration and extraction project
- Providing checkup and testing service for consumer and food samples to determine their content of radioactive and harmful substances in public health
- Providing sterilization services for medical supplies
- Providing quality assurance services for the various projects and work of the commission in line with international standards and foundations
- Coordination and cooperation with international organizations related to the commission's work and following up the implementation of national and regional projects for nuclear applications with international organizations
- Follow up agreements and memorandum of understanding on the international level and on the scope of bilateral cooperation
- Follow up students sent by the authority with international universities
- -Treatment, transportation, storage and protection of radioactive waste at the Kingdom level and protection
- Participate in the nuclear and radiological emergency team at the Kingdom level and provide aid and field assistance
- Achieve the security of existing or transferred nuclear and radiological materials, the security of electronic digital
- documents and information, and protect the computer networks of the commission and its various facilities
 Auditing transactions, agreements, administrative and financial decisions to ensure their consistency with the
- legislation
- Provide training opportunities for specialists and technicians to operate and sustain nuclear reactors and different scientific facilities.
- Implement the Commission's decisions and recommendations of financial and administrative impact.
- Prepare the Commission's annual budget draft.

Staff working in the program:

The program is implemented through a functional staff in 2020 estimated with (223) staff, including (184) males and (39) females .

Budget Chapter 2003 - Jordan Atomic Energy Commission Distributed According to the Program

6184 Nuclear Research/ Nuclear Reactors formerly Program

Objective of the program:

Establish Jordanian center for nuclear research using a (5) MWe, nuclear reactor which can be increased to (10) MWe, and to put under the disposal of researchers from Jordanian institutes and universities, produce radioisotope especially those used in the nuclear medicine, establish neutron activation anlaysis labs and train nuclear engineering and other sciences students.

The strategic objective related to the program :

To establish investment projects to serve the national economy in the field of radiology technology and nuclear energy and to use them in generating electric power and water desalination in addition to other fields.

Directorates associated with the program:

- Nuclear Safety, Security and Guarantees Directorate
- Establishement Operations Directorate
- Technical Support and Supportive Services Directorate
- Nuclear Safety and Licenses Directorate
- Reactor Operation Directorate
- Establishement Maintenance Directorate
- Administrative Services Unit
- Quality Control Unit
- Scientific Research Unit

Services provided by the program:

- Education and training to support nuclear engineering programs and nuclear reactors operation.
- Analysis using Neutron activation technique.
- Produce radioisotopes, of the most important those used in nuclear medicine as Iodine, Molybedenum and Iridium and produce industrial radioisotopes in the following phases.
- Neutron rays applications including non-destructive testing, neutron distraction and neutron defraction.
- Neutron transformation doping.
- Radioactive wastes treatment resulting from using reactor as per international standards and foundations.
- Potential usage as a regional research and training center in cooperation and coordination of the IAEA.

Staff working in the program:

The program is implemented through a functional staff in 2020 estimated with (105) staff, including (72) males and (33) females.
