- Accrediting the calibration and testing labs and authorities which grant conformity certificates and inspection authorities as per the applied international practices.
- Controlling over imported goods and making sure that their conformity with Jordanian technical specifications and rules, and verifying that they are safe for use.
- Executing the market surveys processes for ensuring the conformity of the product with the technical rules and verifies that it is safe for use.

Ministry/Department Contribution to the Achievement of the National Objectives :

- Improving the level of services provided to citizens and fairness in their distribution.
- Creating an attractive investment environment capable of attracting foreign capitals and encouraging local investments.

Major Issues and Challenges which face the Ministry / Department :

- **Reduced demand for some optional services such as screening, certificates of conformity and calibration, due to the presence of competitors providing these services.**
- **Weak economic growth and high inflation rates have reduced citizens' purchasing power, and the institution has placed a greater burden on ensuring that the products put forward and prepared for rollout conform to standard rules and specifications.**
- **The trend towards electronic commerce and the absence of legislative controls governing the control of electronically traded products, which places a greater burden on the enterprise to ensure the conformity and tracking of such products.**
- **Determining the financial ceilings allocated to the Organization before, without taking into account the nature of the Organization's work, its technical particular characteristics, and its role in protecting the health and safety of the citizen.**
